What Is The CIFS Workshop?

A room full of CIFS engineers

- Testing CIFS clients against CIFS servers
- LAN-party for grown-ups

CIFS Workshop And Wine

- Lots of Samba developers around
- Rob Shearman around
- Lots of brain share

Remote Named Pipes

- Not going to be a network protocol
- Using a special file system
- Maybe FUSE wrapping a Samba library
- Maybe add support in the cifs kernel module

End-Point Mapper

- DCE/RPC interface to Samba
- FUSE based interface
- What happens if multiple users run Wine?

ID Mapping

CIFS Report

Kai Blin

ntroduction About The CIFS Workshop

Result

Remote Named Pipes End-Point Mapper

ID Mapping

Testing

Summary

- Can use wbinfo binary
- Depends on winbindd

◆□▶ ◆□▶ ◆目▶ ◆目▶ 目 のへぐ

Authentication

- Possible to use winbind
- Authentication needs root access
- Time for a "wine master server"?

Result

Remote Named Pipes End-Point Mapper ID Mapping

Authentication Testing

Summary

▲□▶ ▲□▶ ▲目▶ ▲目▶ ▲□ ● のへで

Testing

Use Samba4 test environment

- Run secur32 tests.
- How about netapi32
